

METHVEN Showers & Tapware

Tips and inspiration for planning
your bathroom and kitchen

Creating amazing water
experiences since

1886

Our story begins in New Zealand back in 1886 with the forward
thinking and one of a kind design engineer George Methven.

He was a man of character who always had a passion for
pioneering amazing water experiences.

This pioneering spirit continues with us today in everything we do,
driving us to think differently and challenge convention to create
thoughtful, elegant products that transform your day.

IMPORTANT: KNOW YOUR WATER PRESSURE.

Before installing your showers and tapware it is important to know what water pressure your home has.

New building regulations require mains pressure to be limited to 500kPa maximum static pressure at any outlet within a building – Australian Standard AS/NZ 3500.1-2003, clause 3.3.4.

All Methven products are designed in accordance with this regulation. Households which do not meet the requirements defined by AS/NZS 3500.1-2003 can damage the product and void warranty.

While most Methven products are designed to operate on mains pressure installations, select products are able to operate at low or all pressures.

1. HOW DO I CHECK MY WATER PRESSURE?

- **Pressure Limited Valve**
To meet the requirements as per AS/NZ 3500.1-2003 buildings should have a Pressure Limiting Valve (PLV) installed. These valves are usually accessible and installed near the water meter or water supply to the building.
- **Contact Your Plumber**
If you are unsure if your water supply is properly limited. It's always safest to contact your plumber to check.

2. LOOK FOR THE ICON THAT CORRESPONDS TO YOUR PRESSURE:

The operating pressure on each product is clearly labelled using the following icons:

MAINS PRESSURE.
Operates on mains pressure installations between 150kPa – 500kPa.

ALL PRESSURE.
Operates on all pressure installations between 35kPa – 500kPa.

Designed with you in mind

We want to make your experiences with water truly memorable. To do this we spend a lot of time studying and researching what people want, anticipating even the smallest of needs to deliver truly amazing water experiences.

At Methven, our design team uses a human-centric design approach. Our products are intuitive, precisely balanced and designed to be easy to use. We raise the standard with everything we create.

Our leading technology and rigorous testing is driven by our relentless pursuit of excellence.

Steve Dixon

Toolmaker
30 years of service

Guaranteed quality

We're proud to stand by each and every one of our products with a 15-year, 20-year or lifetime warranty.

The reason for this is simple: we design and engineer our products in New Zealand, so that we have control over the process from start to finish. We constantly push for perfection. In fact there is not a single component that hasn't been considered and refined for quality and durability at every stage - from design and engineering right through to manufacturing, crafting and even packaging.

Lake Tekapo
South Island, NZ

Committed to the environment

At Methven we're committed to protecting the planet and reducing our environmental impact to help conserve the earth's natural resources.

Water is the earth's most precious commodity. Currently around one fifth of the world lives in a water scarce region. And with water usage growing at twice the population rate, its preservation will only become more vital in years to come.

That's why at Methven we make taking care of water a primary focus in every product we develop.

For example, did you know that your shower uses around 30% of your household water consumption? So we've developed innovative technologies - such as Satinjet® and Aurajet® - that deliver a luxurious shower experience, all whilst actually using less water.

Methven. Conserving energy and water to protect
the planet for generations to come.

Your bathroom, the choice to relax or revitalise

Your bathroom plays a vital role in your day. It invigorates you in the morning and relaxes you in the evening. So when you take on a bathroom project, be sure to consider the things that are most important to you with the help of this quick guide.

1. DECIDE WHAT TYPE OF BATHROOM YOU NEED:

When planning your new bathroom it's important to begin by thinking about how it will be used and by whom. People's requirements can often be very different:

Family bathroom: In a family bathroom you want to create a space that caters for growing families.

2. MAKE A LIST:

Before planning your layout think carefully about what you like and dislike about your current bathroom. Make a list and prioritise which features you'd most like to see in your new bathroom. Maybe it's an oversize walk-in shower, a large vanity with two sinks, a separate enclosure for your toilet, or a large free-standing bath.

3. GET INSPIRATION:

Gather inspiration of bathrooms you like from magazines and the internet. This could help when you're planning your layout.

Ensuite: An ensuite should be a sanctuary that's both luxurious and practical – a space where you can escape and relax.

Guest bathroom: Here you want to create a space that is both welcoming and pampering.

Rental property: Reliability and durability are the most important when selecting products for a rental property.

Some handy tips

Whether it's a new home build, renovation or a quick refresh, Methven has you covered with showers and tapware to suit any bathroom.

QUICK BATHROOM REFRESH

This can be as easy as changing your shower, either the shower handset or the whole rail shower. It's not difficult to do – either by screwing in a new handset on to your existing hose, or retro-fitting a new rail shower with adjustable mounting brackets so there's no need to drill additional holes. You'll be surprised at how a little added shower luxury can improve your day.

NEW BUILDS AND RENOVATIONS

When you're ready to choose bathroom fittings, start with the shower first. Why?

Because the shower is an important space. You spend a lot of time in it and for many it's the only time of day when you get some 'me' time.

4. PLANNING YOUR LAYOUT

Your new bathroom layout can make all the difference, so be sure to plan carefully:

Bathtub – These days many people are trading or downsizing their bath for a luxurious walk-in shower. This can be a great option, although you may want to consider retaining at least one bath in the house – it can add to the value of your property.

Vanity – The vanity plays an integral role in your bathroom – choose a spot that won't interfere with your traffic, and make sure there's room above for mirror and wall cabinets.

Shower – Make the best use of space in small bathrooms by going for an open walk-in shower that doesn't need a curtain or door.

Plumbing Practicalities – Plumbing is a major cost in any bathroom project. In a renovation, try to keep costs down by limiting the need for adjusting your existing plumbing set-up.

Your shower experiences

Your shower should be a highlight of your day, transforming body and mind. But everyone has their own idea of the perfect shower. That's why at Methven we've spent a huge amount of time researching people's preferences, and creating innovations that turn your shower time into an amazing experience, every time.

Aurajet®

The next generation of showering has arrived.

20% more spray force and twice the amount of water on your skin than a conventional shower*.

Satinjet®

A sensation only your skin can truly understand.

An amazing full-body shower sensation. Satinjet® turns an everyday ritual into an experience like no other.

Airstream™

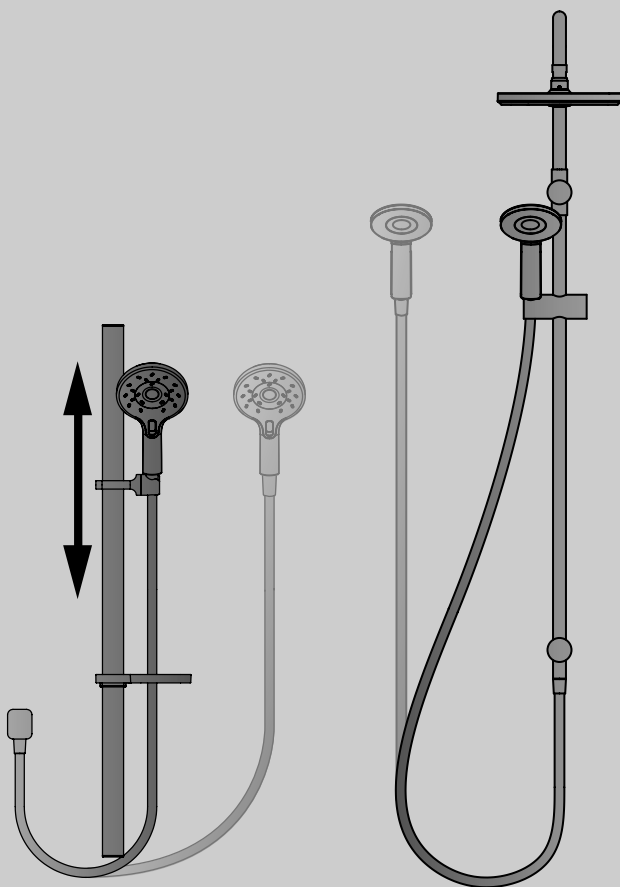

Like your own personal rain shower.

Airstream technology mixes air with water to create a refreshing, rain-like more voluminous shower experience.

* Compared to a Methven Conventional Shower at 7.5L per minute.

Which shower?

There's an abundance of different shower types to choose from across the Methven range. Here's a quick guide to ensure you choose the right shower for your bathroom environment:

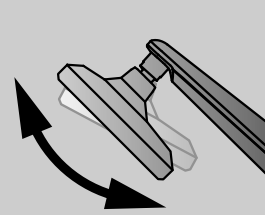

RAIL SHOWER

Offers great flexibility – height adjustability so the smallest or tallest users can enjoy a great shower, plus a handset that can be picked up for direct body showering. Perfect for the family bathroom.

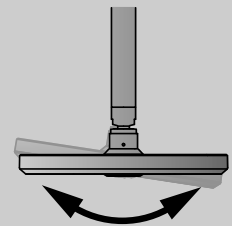

TWIN SHOWER SYSTEM

The ultimate shower for those who want the best of both worlds. Enjoy the flexibility of a rail shower with the added luxury of an overhead shower. Great for ensembles.

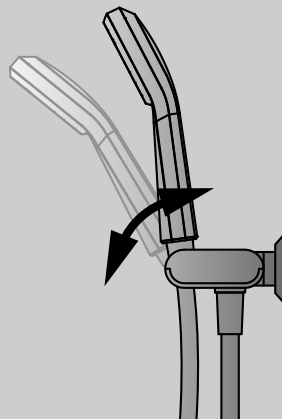

WALL SHOWER

Compact, durable and easy to clean. A popular choice for confined areas, commercial spaces and rental properties.

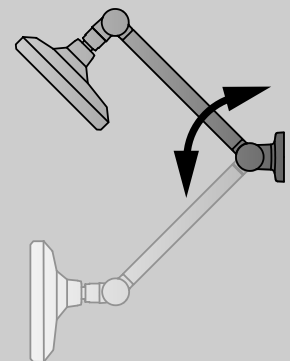

OVERHEAD SHOWER

For those who want an elegant yet minimalist look and a fully immersive experience. Overhead Showers are the ideal choice.

HAND SHOWER

The simplicity of a fixed-point shower with the versatility of a movable showerhead. Can also be a handy addition to your bath or combined with an overhead for a more luxurious experience.

HI RISE SHOWER

A wall shower with the added bonus of height adjustability. Works well in a family bathroom.

METHVEN

Aurajet®

The next generation of showering has arrived.

Introducing Aurajet®. Our most advanced, most invigorating shower experience ever, that turns conventional showering on its head.

Invisible nozzles generate individual jets of water that collide against precisely angled surfaces hidden within the contours of the unique halo-shaped showerhead.

The result is a stunning fan of luxuriously dense droplets that delivers a highly efficient shower with 20% more spray force and twice the amount of water contact on your skin than a conventional shower*. All this adds up to an enveloping warmth that has to be felt to be believed, and a heavenly experience that puts you in a great space, every time you shower.

*Compared to a Methven Conventional Shower at 7.5L per minute.

20⁰%

MORE SPRAY FORCE*

2x

**THE AMOUNT OF
SKIN CONTACT***

Aurajet® Rua

The Rua shower employs groundbreaking Aurajet® technology to deliver a full-bodied spray with maximum body contact and all-over warmth.

It's our most invigorating shower experience yet.

AURAJET

A stunning fan of luxuriously dense droplets that deliver a highly efficient shower with 20% more spray force and twice the amount of water on your skin*.

*Compared to a Methven Conventional Shower at 7.5L per minute.

WIDE COVERAGE

A wider, well-balanced spray for superior body coverage.

METHVEN

Satinjet®

A sensation only
your skin can truly
understand.

Turn an everyday ritual into a shower experience with award-winning Satinjet® technology from Methven.

Unlike conventional showers, Satinjet® uses unique twin-jet technology to create optimum water droplet size and pressure, with over 300,000 droplets per second. The result is an immersive, full-body shower sensation that transforms your regular shower into an experience like no other.

And because we know everyone has their own idea of the perfect shower, Methven has crafted a range of Satinjet® showers you can match to your individual needs – from gentle and enveloping to powerful and invigorating.

Satinjet® from Methven – prepare yourself for a truly sensational shower experience.

CHOOSE THE PERFECT SHOWER FOR YOU

WAIPORI

Its curved edges and face soften the geometric styling, creating a modern alternative to square styles whilst offering a widespread spray.

KIRI

Available in both full chrome and graphite faceplates, this collection fuses product functionality with architectural design, offering a wide well-balanced spray.

MAKU

A compact, yet powerful shower experience that is ideal for smaller showering spaces.

FUTURA

A streamlined, classic round design for traditionalists seeking a full body spray with optional massage.

Satinjet® Waipori

In our distinctive Waipori collection, we have taken traditional geometric shapes and subtly tapered them for the modern bathroom. Attractive, slimline and compact.

SATINJET

A full-body shower experience, like no other. Satinjet®'s colliding twin jets produce over 300,000 droplets of water per second for the ultimate shower experience.

OVERHEAD ULTRA WIDE COVERAGE

A full-bodied spray for all-over warmth and maximum body contact.

WIDE COVERAGE

A wider, well-balanced spray for superior body coverage.

METHVEN

Airstream™

Welcome to softer, lighter, more voluminous showering.

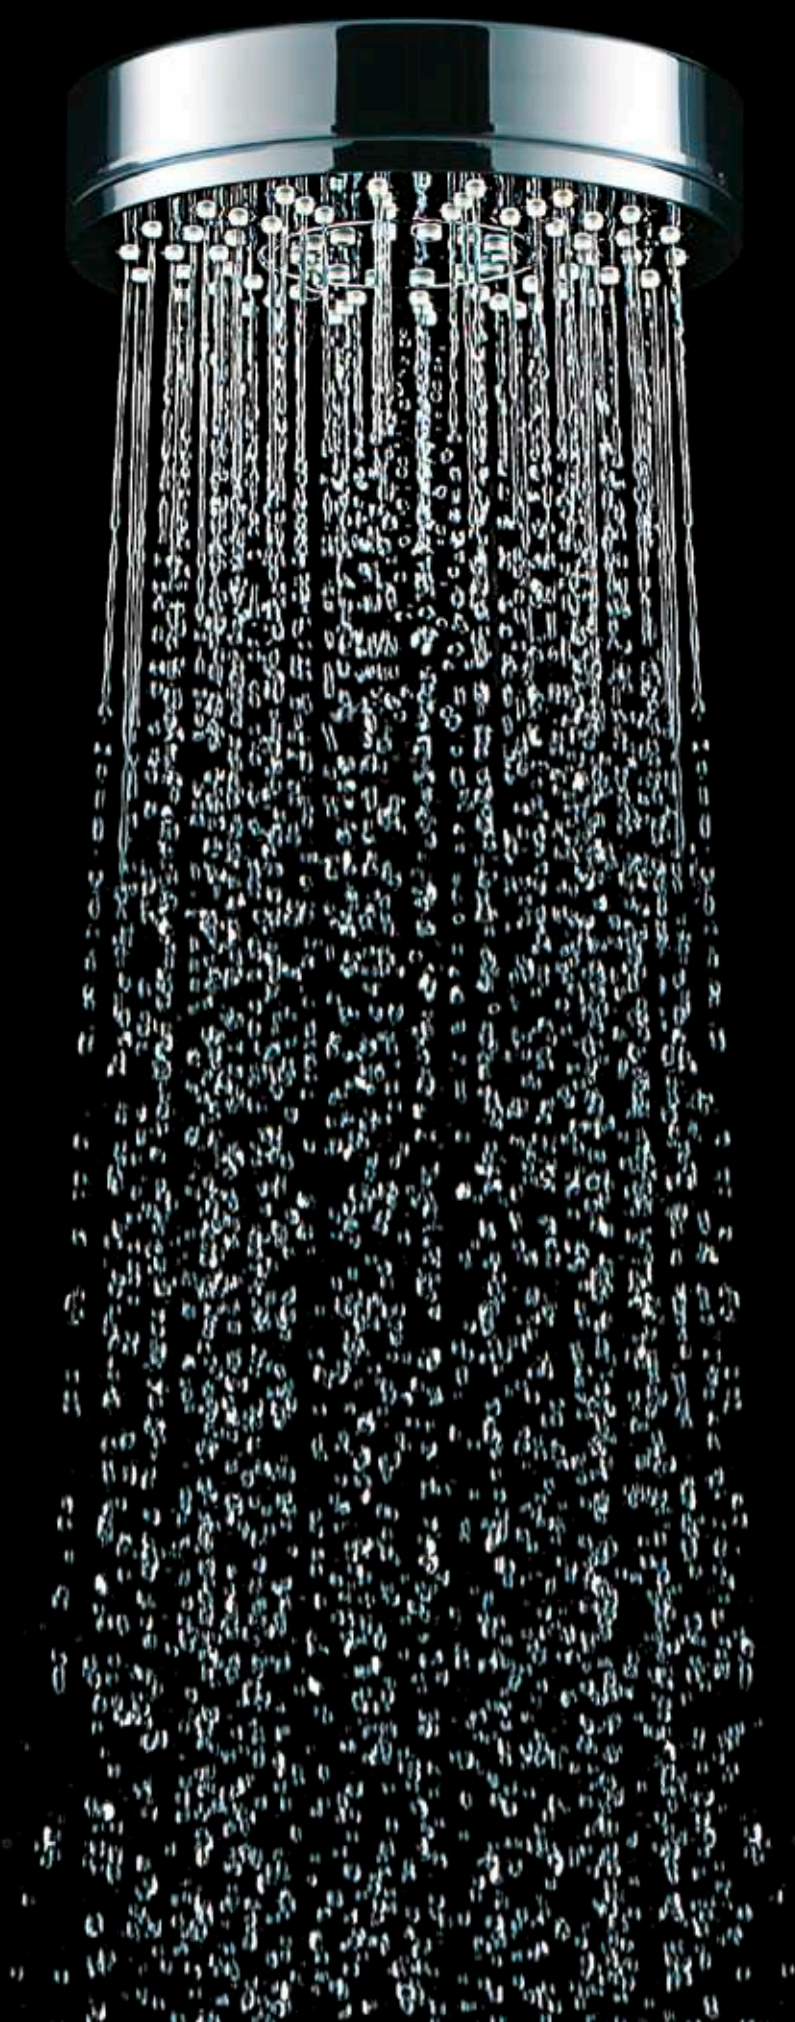

Welcome to Airstream™ from Methven. A refreshing combination of air and water that delivers a gentle, rain-like feel to your showering.

Fully integrated into the base of the handset, Airstream™ technology allows air to be drawn in and mixed with water at high pressure. Each air infused droplet then emerges from the showerhead as a larger, softer rain-like drop.

The result is a more refreshing all-over shower experience.

Airstream™ from Methven - a simple and smart choice for any bathroom shower experience.

Airstream™ Easy-Click

The Easy-Click range allows a seamless transition between shower sprays with the simple click of a button and features a design that marries on-trend minimalism and adjustability.

AIRSTREAM

Airstream technology aerates each water droplet to increase its volume – thus creating a refreshing shower experience.

MASSAGE

The voluminous Airstream experience with an added massage function for a more powerful spray - ideal for rinsing your hair.

Our tapware and mixer innovations

At Methven we like to make things better.
So we spend a great deal of time and effort on research
and development to improve our products.
Here are just some of our success stories.

Rob Bolus
Head of Technology
30 years of service

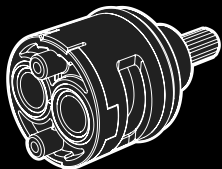

Setting a new standard in tapware EcoBrass®

Thoughtfully designed with you in mind. At Methven we believe that sometimes it's the details you can't see that matter most.

On select ranges Methven utilises EcoBrass® in our tapware, a revolutionary high quality, high strength material that is lead and heavy metal free, preserving water quality for both consumption and bathing.

EcoBrass® tapware's unique composition, lead free and with added silicon, is also extremely resistant to discoloration and corrosion. The result is durable, high quality fittings that last longer, caring for your health and reducing impact on the environment at the same time.

Methven, continuously raising the standards.

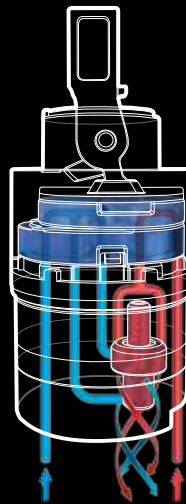

CERAMIC DISCS

Reliable technology that saves water – and money.

Ceramic discs ensure your taps work well, are safe to use and help you to conserve water.

A more durable replacement for conventional washers, ceramic discs won't wear out - which means dripping taps are a thing of the past.

SAFEFLOW™

Say goodbye to temperature fluctuations.

SafeFlow™ removes sudden hot or cold water temperature fluctuations to deliver consistent water temperature to your shower.

Thermal shut off element blocks hot water flow if cold water pressure is lost.

Maximum temperature delivered from the SafeFlow cartridge will not exceed 45°C.

Aio

Aio tapware combines intriguing sculptural contours with modern minimalist design.

LEAD FREE BRASS

Using Eco Brass® to protect water quality and for enhanced corrosion resistance.

CERAMIC CARTRIDGE

Your kitchen, the heart of your home

You spend more active time in the kitchen than any other room in the house, and your kitchen tapware is at the heart of this - so it's important to select the tapware that's right for you.

Think about how you use your kitchen tapware:

Whether you're looking to buy kitchen tapware as part of a renovation, new build or simply because your current mixer is in need of replacement, it's important to think about the everyday tasks you use it for. For example, food preparation, washing dishes, rinsing dishes, making drinks, washing hands or even watering your plants. Considering all the facts will help you choose the right combination of features.

Choosing the right kitchen tap:

1. CONSIDER THE MOUNTING TYPE – DO YOU WANT IT DECK (BENCH) OR WALL MOUNTED:

Deck mounted – Is a more contemporary look and gives you greater flexibility for kitchen sink placement.

Wall mounted – Gives a more classic look and is more cost effective if you're replacing an old wall-mounted kitchen tap.

2. CONSIDER HOW YOU WANT TO CONTROL YOUR KITCHEN TAP:

Mixers – Contemporary look and simple single handed operation.

Also, if you prefer a mixer do you want the handle positioned on the side, front or top? Methven have deck mounted mixers that allow you to position the handle at either the front or side.

Separate handles – The classic look, allowing you to control the cold and hot water individually.

3. CONSIDER YOUR SPOUT HEIGHT – HIGH VS LOW:

High spout – Gives a more contemporary look and makes filling large pots much easier.

Low spout – Is great when space is at a premium, such as when you have a cabinet or window above the sink.

4. WHAT ABOUT A PULL-OUT SPOUT:

This is a feature where the spout head pulls out towards the sink on a flexible hose, giving increased flexibility and manoeuvrability – very handy for cleaning vegetables, rinsing pots and pans or rinsing down the sink.

Sink Mixers

Single-lever mixers with a taller spout to suit both kitchen and laundry sinks. With the convenience of easy one-handed temperature and flow control.

WAIPORI TWIN SHOWER SYSTEM
WASSCPWHAU

- Exposure rail with in-built water delivery point to eliminate the need for a separate wall elbow
- Easily switches from handset to overhead shower with the integrated water diverter
- Height adjustable handset holder with twist action slider

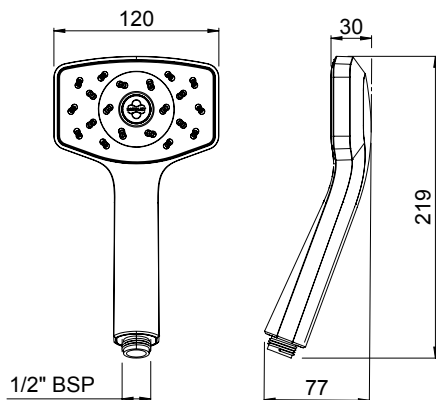

WAIPORI HAND SHOWER
WAWOBCPWHAU

- Stylish round wall outlet bracket

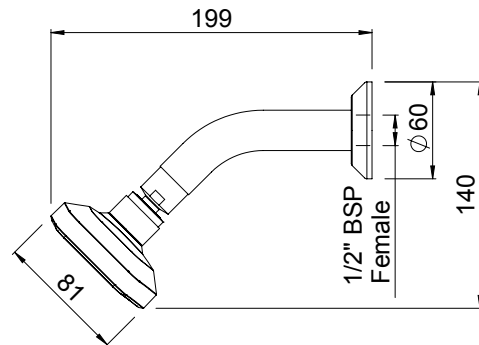

WAIPORI HANDSET
WAHSCPWHAU

WAIPORI WALL SHOWER ON CONVENTIONAL ARM
WACACPWHAU

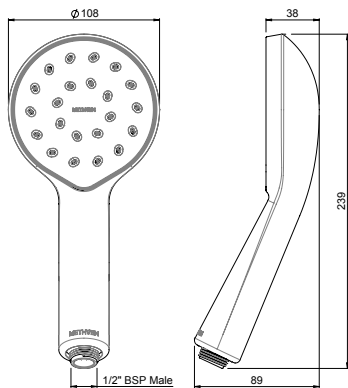

- Durable solid brass modern arm with flange
- Brass, adjustable ball joint connection

Technical Drawings

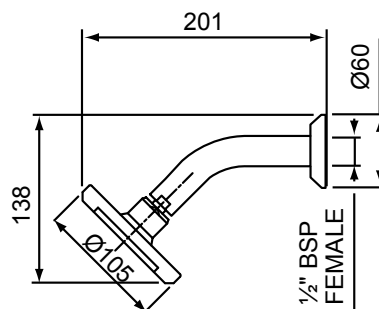

KIRI MK2 HANDSET CHROME > KRHSCPAU

- Easy screw-off, screw on installation

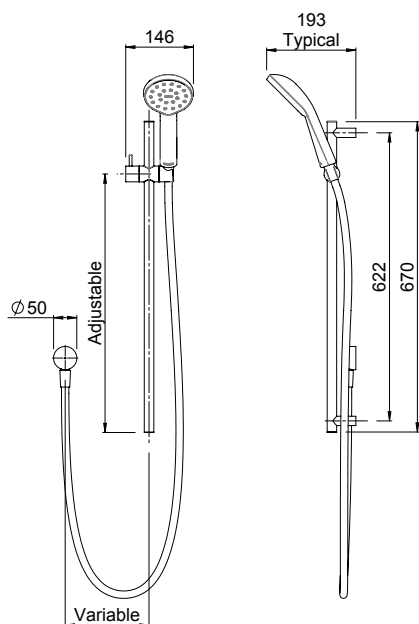

KIRI WALL SHOWER ON CONVENTIONAL ARM GRAPHITE > 13-7305

- Durable solid brass modern arm with flange
- Brass, adjustable ball joint connection

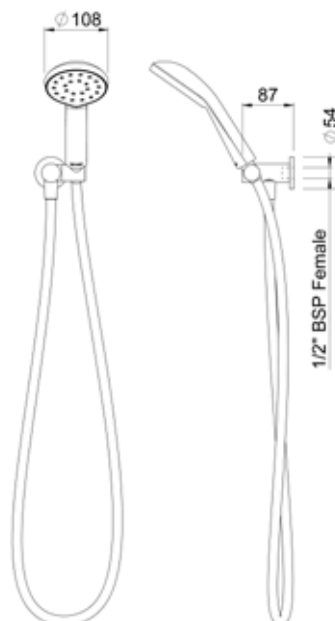

KIRI MK2 RAIL SHOWER CHROME > KRSRCPAU

- High quality 670mm elliptical rail with solid metal mounting points for extra durability
- Height adjustable, push button slider with reinforced metal handset holder

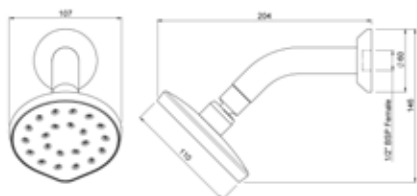

KIRI MK2 HAND SHOWER CHROME > KRWOBCPAU

- Stylish round wall outlet bracket

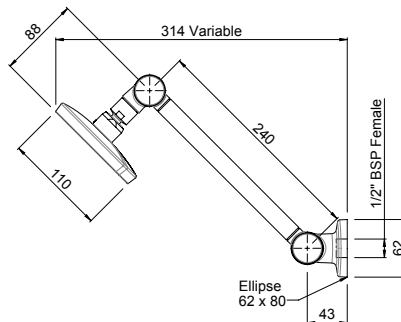

KIRI MK2 WALL SHOWER ON UPSWEPT ARM
CHROME > KRCCAPAU

- Durable solid brass upswept arm
- Brass, adjustable ball joint connection

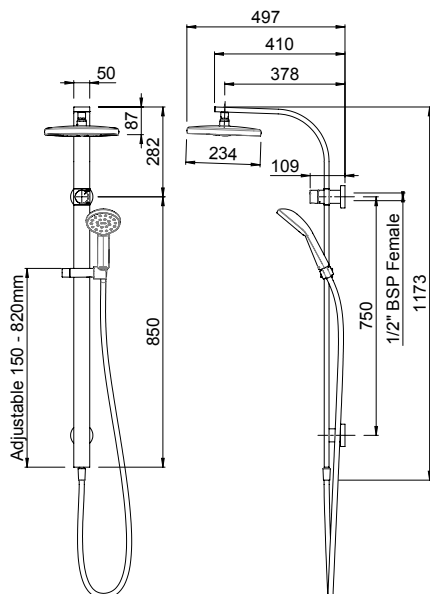

KIRI MK2 HI RISE SHOWER
CHROME > KRHRCPAU

- Height adjustable, never droop, brass hi rise arm that will not loosen or drop with use
- Brass, adjustable ball joint connection

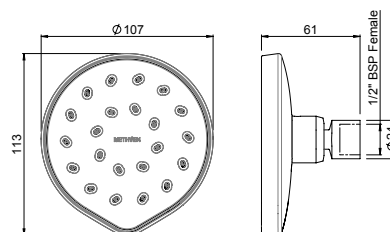

KIRI MK2 TWIN SHOWER SYSTEM
CHROME > KRSSCPAU

- Exposure rail with in-built water delivery point to eliminate the need for a separate wall elbow
- Easily switches from handset to overhead shower with the integrated water diverter
- Height adjustable handset holder with push button slider

- Stylish round wall outlet bracket

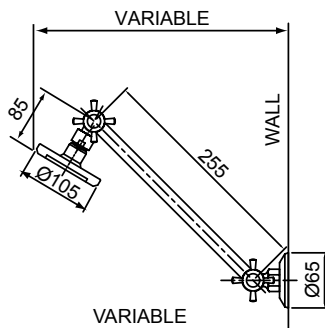

KIRI RAIL SHOWER
 GRAPHITE > 13-3208P

- High quality 770mm elliptical rail with solid metal mounting points for extra durability
- Height adjustable, push button slider with reinforced metal handset holder

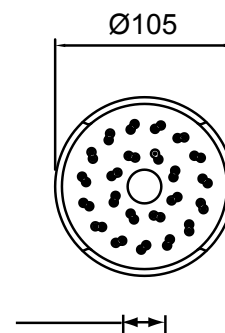

KIRI HI RISE SHOWER ON CAPSTAN ARM
 GRAPHITE > 13-7077P

- Height adjustable, 255mm hi rise arm with self-tightening capstan nuts
- Brass, adjustable ball joint connection

KIRI WALL SHOWER ROSE
 GRAPHITE > 13-7404P

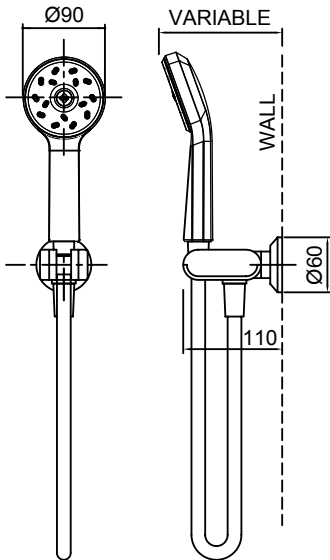

- Brass, adjustable ball joint connection

Technical Drawings

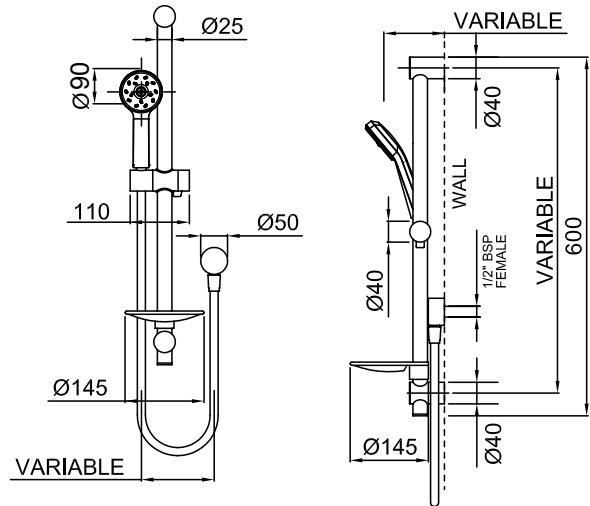

MAKU HAND SHOWER 13-4502P

- Stylish and sturdy SAM wall outlet bracket

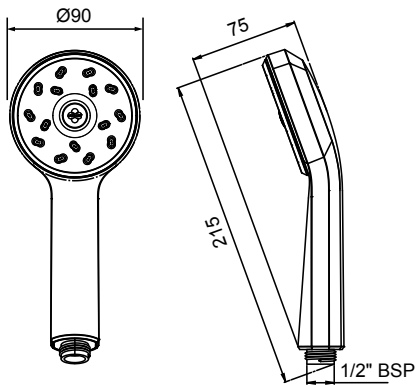

MAKU RAIL SHOWER 13-4601P

- Stylish 600mm round rail
- Adjustable bottom pillar for easy retro-fit installation
- Height adjustable handset holder with easy-glide push button slider

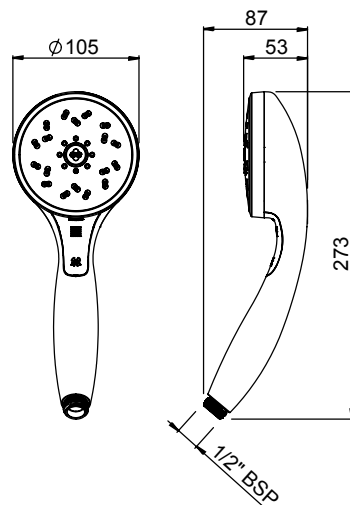

MAKU HANDSET 13-4700

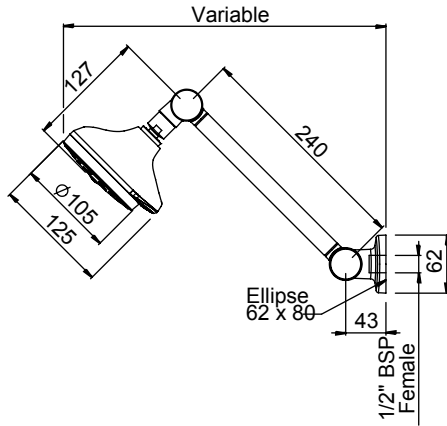

FUTURA HANDSET 13-0306

- Unique push button built into handset to change spray pattern

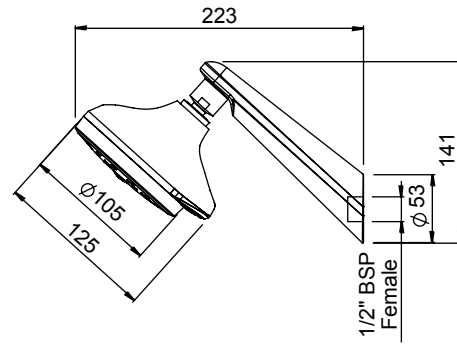

FUTURA HI RISE SHOWER
13-5011

- Unique push button built into rose to change spray pattern
- Height adjustable, never droop, brass hi rise arm that will not loosen or droop with use
- Brass, adjustable ball joint connection

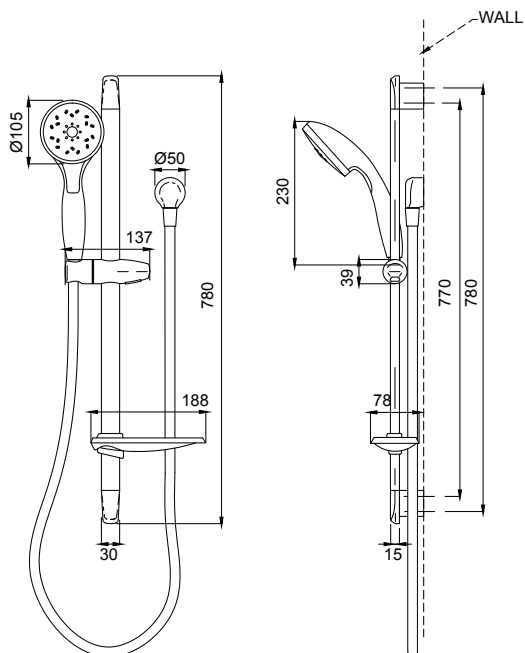

FUTURA WALL SHOWER ON UPSWEPT ARM
13-5202

- Unique push button built into rose to change spray pattern
- Durable solid brass upswept arm
- Brass, adjustable ball joint connection

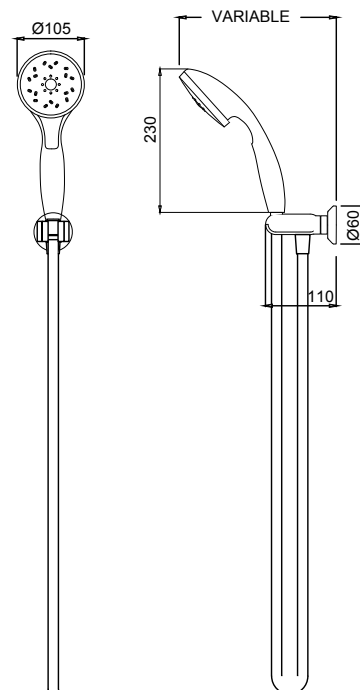

FUTURA RAIL SHOWER
13-0207

- Unique push button built into handset to change spray pattern
- High quality and stylish 770mm elliptical rail with solid metal mounting points for extra durability
- Height adjustable, push button slider with reinforced metal handset holder

FUTURA HAND SHOWER
13-0108

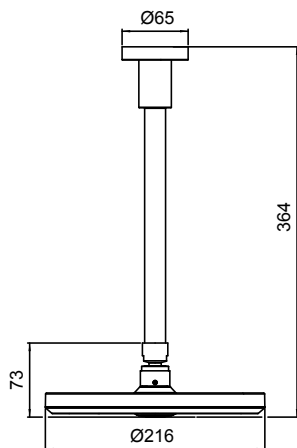

- Stylish and sturdy SAM wall outlet bracket

EASY-CLICK HAND SHOWER 3 FUNCTION

19-2120

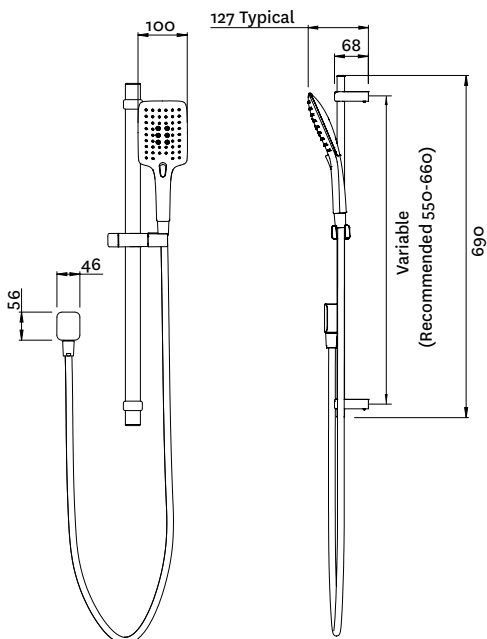

- Stylish deluxe square wall outlet bracket

EASY-CLICK RAIL SHOWER 3 FUNCTION

19-2113

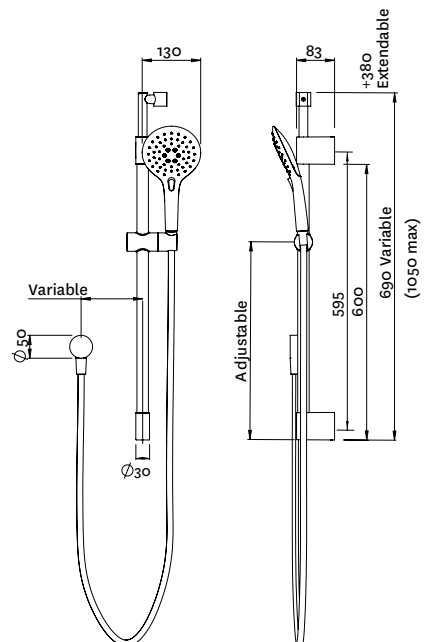

- Stylish square 690mm rail with adjustable pillars to allow easy retrofit to existing holes
- Height adjustable handset holder with twist-lock slider

EASY-CLICK TELESCOPIC RAIL SHOWER 3 FUNCTION

19-2106

- Telescopic rail slides out to extend rail height by 380mm for a maximum height of 1070mm
- Interchangeable handset position allows handset to be placed in optional overhead position
- Round rail with solid mounting points for extra durability
- Height adjustable handset holder with push button slider

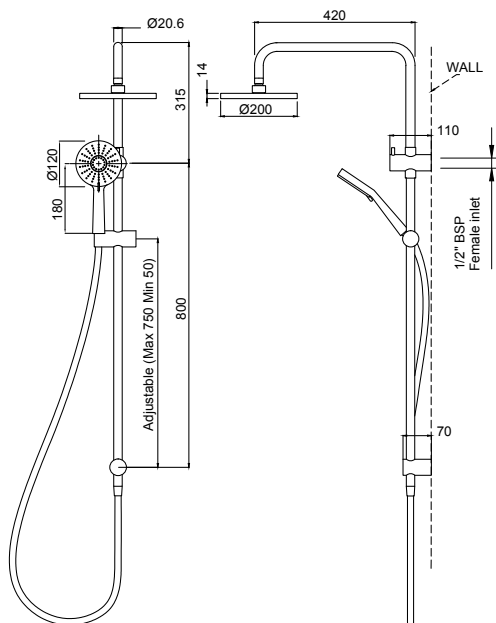

Technical Drawings

KROME TWIN SHOWER SYSTEM

CHROME > 17-7134M

MATTE BLACK > 17-7134MBK

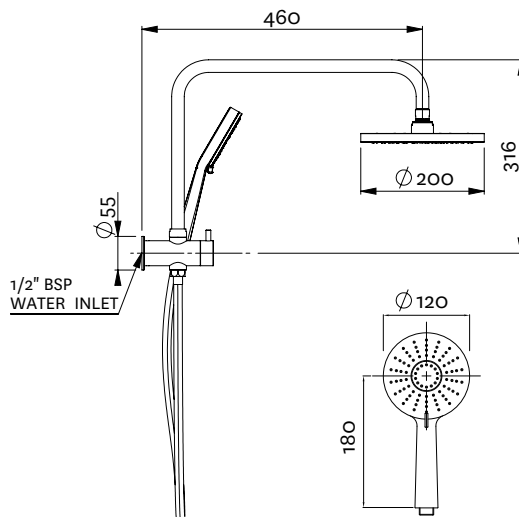

- Exposure rail with in-built water delivery point to eliminate the need for a separate wall elbow
- Easily switches from handset to overhead shower with the integrated water diverter
- Height adjustable handset holder with push button slider
- Adjustable bottom pillar for easy retro-fit installation

KROME SHORT TWIN SHOWER SYSTEM

17-7165M

- Short exposure rail with in-built water delivery point and handset holder to eliminate the need for a separate wall elbow
- Easy switch from handset to overhead drencher with the water diverter
- Easy screw-off, screw-on installation with no drilling required

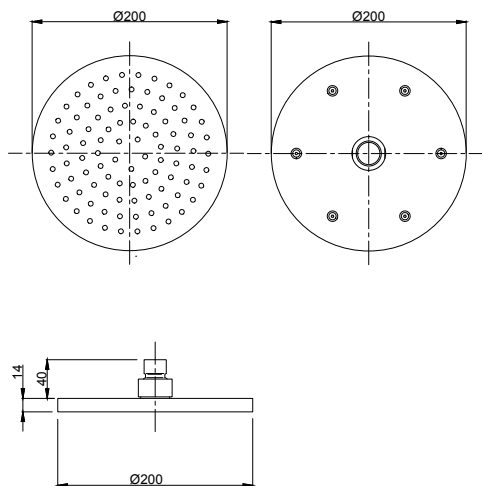

KROME OVERHEAD SHOWER (200MM)

CHROME > 17-7233M

MATTE BLACK > 17-7233MBK

- Brass adjustable ball joint connection

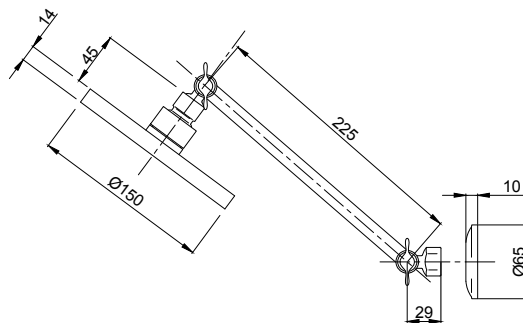

KROME HI RISE SHOWER (150MM)

CHROME > 17-7257M

MATTE BLACK > 17-7257MBK

- Height adjustable, 255mm hi rise arm and wall plate
- Adjustable ball joint connection

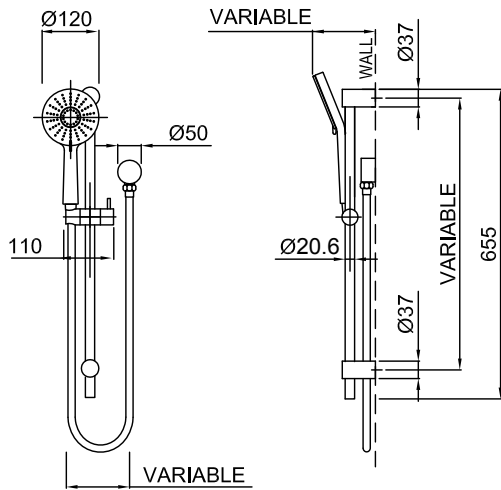

KROME RAIL SHOWER 3 FUNCTION (120MM)

CHROME > 17-7226M

MATTE BLACK > 17-7226MBK

AIO BASIN MIXER
AOBCPAU

- 35mm ceramic disc cartridge can be adjusted to reduce the temperature setting, saving energy
- ASD aerator included for optimised water stream direction
- Twin-stud mounting for secure basin installation

AIO BASIN MIXER
AOBMCPAU

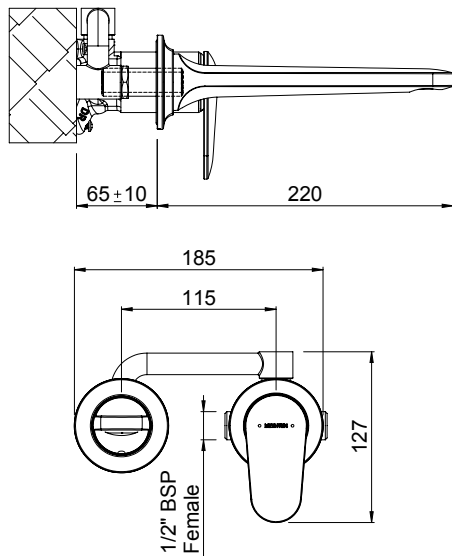

- 25mm ceramic disc cartridge can be adjusted to reduce the temperature setting, saving energy
- ASD aerator included for optimised water stream direction
- Twin-stud mounting for secure basin installation

Technical Drawings

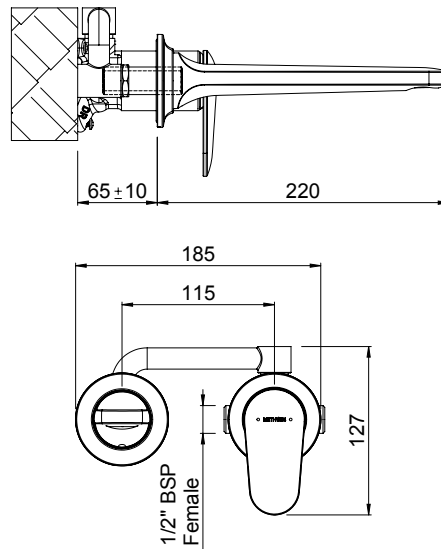

AIO WALL MOUNTED BASIN MIXER WITH SPOUT AOWBCPAU

- 35mm ceramic disc cartridge can be adjusted to reduce the temperature setting, saving energy
- ASD aerator included for optimised water stream direction
- Wall breach included

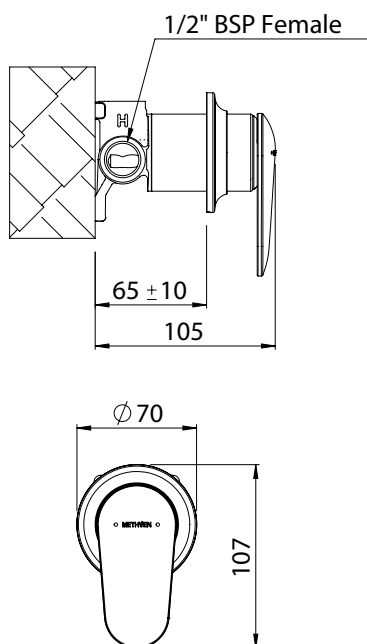

AIO WALL MOUNTED BATH MIXER WITH SPOUT AOWBTCPAU

- 35mm ceramic disc cartridge can be adjusted to reduce the temperature setting, saving energy
- ASD aerator included for optimised water stream direction
- Wall breach included

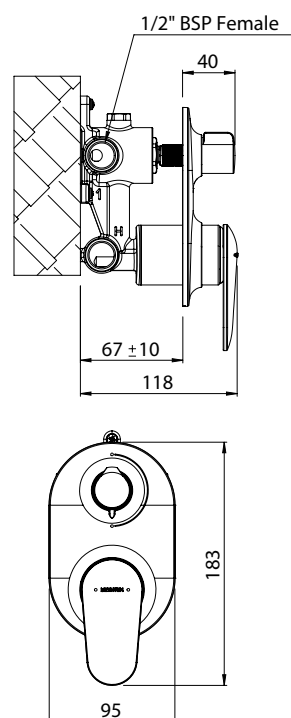

AIO SHOWER MIXER AOHPSCPAU

- 35mm ceramic disc cartridge can be adjusted to reduce the temperature setting, saving energy
- Incorporates brass lugs for ease of mounting

AIO SHOWER MIXER WITH DIVERTER AOHPSDCPAU

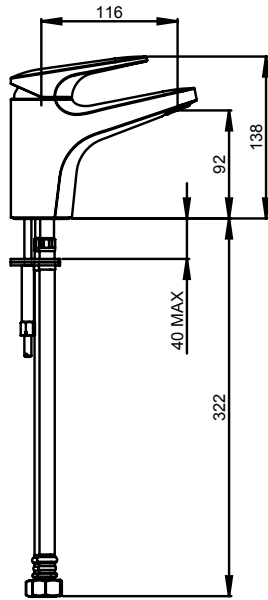

- 35mm ceramic disc cartridge can be adjusted to reduce the temperature setting, saving energy
- Shower mixer with easy turn-dial diverter defaults to bath spout
- Incorporates brass lugs for ease of mounting

KAHA SWIVEL BASIN MIXER

01-7003

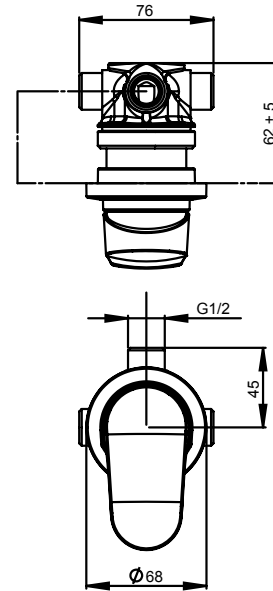

- 35mm ceramic disc cartridge can be adjusted to reduce the temperature setting, saving energy
- Swivel spout fitted with ASD aerator for optimised water stream direction
- Twin-stud mounting for secure basin installation

KAHA SHOWER MIXER

01-7102

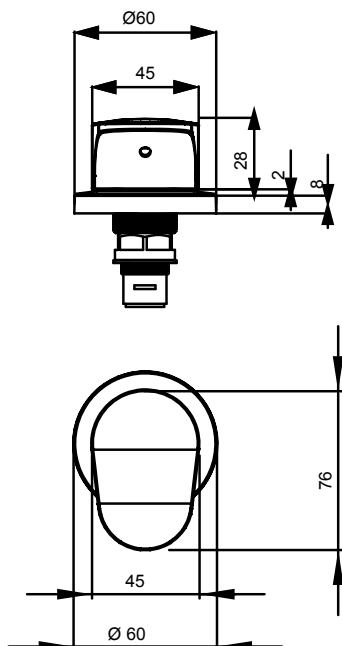

- 40mm ceramic disc cartridge can be adjusted to reduce the temperature setting, saving energy
- Incorporates brass lugs for ease of mounting

KAHA WALL TOP ASSEMBLY

01-7706

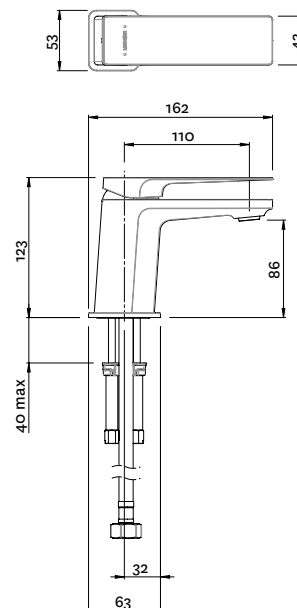

- Standard Pair
- 1/4 turn ceramic disc technology
- Contra-rotating handles

SURFACE BASIN MIXER

SFBCPAU

- Twin-stud mounting for secure sink installation

Standard Warranty

Please retain your proof of purchase. Ensure your purchase information is safe by registering your product online at www.methven.com/register.

Methven Australia Pty Ltd ABN 15 104 813 390 of 16 Gipps Street, Collingwood, Melbourne VIC 3066 Australia (phone: 1300 638 483) (Methven) provides the following warranty for all tapware, showers, accessories and valves purchased in Australia from authorised Methven resellers for use in domestic residential (indoor) or commercial (indoor) installations (Goods). Commercial installations are all non-residential installations including hotels, motels, gyms, clubs, factories, schools, hospitals, restaurants and aged care facilities.

WARRANTY PERIODS

SHOWER WARRANTY

Flexispray Project	1 Year	1 Year	1 Year

ACCESSORIES WARRANTY

All Methven Accessories come with a:

- 10 Years Replacement Warranty for Domestic / Residential use (for original purchaser)
- 1 Year Replacement Warranty for Commercial use

All Flexispray Accessories come with a:

- 12 Months Replacement Warranty for Domestic / Residential use (for original purchaser)

***Note: The warranty on the finish of non-chrome products is 3 years from date of purchase by the original purchaser.**

Products made of stainless steel or have a chrome finish are exempt and will carry the full warranty period as above.

NEFA VALVES WARRANTY

NEFA valves are not fit for purpose after a 5 year period from manufacture date (as per coded stamp on each product).

The date of manufacture is marked on the valve, represented by a five digit number. The first two digits of the date of manufacture refer to the last two digits of the year of manufacture. The remaining three digits refer to the numerical day of the year in which the valve was manufactured (for example, 30 June 2007 would be represented as 07181).

Methven will (at its cost) replace any NEFA valve to the original purchaser if it is purchased with less than 12 months remaining of the 5 year expiration period from manufacture date (as per coded stamp on each product).

Proof of purchase must be provided for the replacement to be authorised to the original purchaser only.

WARRANTY STATEMENT (SHOWERS / TAPWARE / ACCESSORIES / VALVES)

- If during the applicable warranty period set out above (Warranty Periods), a Good has a material defect which arose in the course of manufacture then, subject to the warranty conditions below being met, you may submit a warranty claim to Methven by email: customercare@au.methven.com, by calling Customer Care Australia on ph: 1300 638 483 or by mail to 16 Gipps Street, Collingwood, Melbourne VIC 3066. Methven may require you to return the Good, and you must pay the expenses for such return.
- Methven will (at its cost) either repair or replace (at Methven's option) the Good. Methven will pay the expense for shipment of the repaired or replaced Good to you.
- This warranty is applicable only on Goods purchased and installed in Australia.
- Your rights under this warranty are in addition to and do not in any way affect any other rights or remedies that you have under any law which relates to the Goods.
- Our Goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the Goods repaired or replaced if the Goods fail to be of acceptable quality and the failure does not amount to a major failure.
- Should any warranty claim be made and attended to by a Methven authorised Service Agent and that in the opinion of the Service agent or Methven, the problem was from a faulty installation or use of the products in conjunction with products of another manufacturer or from some other cause other than a manufacturing defect of the products for which Methven is responsible, Methven reserves the right to charge a service fee for each service staff attending the premise where products have been installed.

WARRANTY CONDITIONS

The Methven warranty set out in the Warranty Statement above (other than sections 1(d) and 1(e)) is subject to the following conditions, and accordingly shall not apply if:

- The Good was not new as at the date of purchase or proof of purchase details (such as invoice, receipt or transaction record) are not provided.
- There is a failure to follow Methven's installation instructions, evidence cannot be provided that the Good was installed by a licensed plumber or the Good is used other than in accordance with Methven specifications.
- Repair work is performed on the relevant Good by a person other than Methven, its authorized service agents or any plumber who has not received authorisation from Methven prior to proceeding with the work.
- Applicable statutes or regulations relating to public health are not observed.
- Standards or regulations governing sewerage, plumbing, water supply and gas applicable to the location of the particular plumbing installation are not observed. This includes (without limitation) the Australian Standards (AS/NZ 3500.1 Plumbing and Drainage Part 1: Water services) which specify that water pressure must be limited to 500kpa on any new home, extension or renovation. The recommended continuous operating pressure for tapware is between 150-500kpa (maximum static pressure must not exceed 500kpa).
- Harsh detergents or abrasive cleaners are used on any finishes of the Good.
- The Good is not installed in accordance with the relevant Australian Standards and Plumbing Codes.
- The Good has been tampered with or repaired (other than by or on behalf of Methven) in any way.
- The Good has been damaged by misuse, accident or neglect.
- The Good has discolouration, corrosion or rusting from 'hard' water and/or other environmental factors.
- Adequate access to products, fittings and fixtures to undertake extended warranty repairs is required. Methven will not be responsible for any consequential damage or costs where adequate access to product fittings and fixtures is not accessible.
